

The Hynor Lillestrøm Concept

Demonstration of Systems & Technology:

- Renewable Energy & Hydrogen Production
- Local Hydrogen Supply
- Hydrogen Compression
- Refueling of Fuel Cell Vehicles
- Distributed Power with Fuel Cells

Key Technologies

Research, Development & Innovation:

- Sorption Enhanced Steam Methane Reforming
- Water Electrolysis
- Metal Hydrides
- Hydrogen Purification
- Solid Oxide Fuel Cells

Water Electrolysis & Hydrogen Refueling

Fuel Cells

Metal Hydride

Reformer
